Installation Instructions

If you determine that less than 12” of surfacing is required, make sure the top of the concrete slab is 12” below the top of the protective surfacing.

Installation Instructions

NOTE: Read installation instructions thoroughly before starting installation process.

Step 1: Lay out the area and prepare the site for install. Concrete must be installed over a solid, level base. Check local soil condition and codes. See installation instructions for minimum use zone requirements to ensure proper spacing and adequate surfacing area.

Step 2: Pour a concrete base for the climber. Refer to the typical slab section on this page. The concrete should be flush with the ground level. Allow time for the concrete to completely cure before continuing.

Step 3: Using an appropriate lull-type forklift or boom, place climber into final installation location. See the hardware recommendation page for information on anchoring equipment down to your slab. Refer to the surfacing manufacturer for installation of an approved impact attenuating play surface around the climber with a minimum of 6 feet in every direction

TYPICAL 4" CONCRETE SLAB DETAIL (NOT TO SCALE)
CHECK LOCAL SOIL CONDITIONS.

NOTES PRIOR TO CONSTRUCTION:

- Use appropriate equipment to lift and move the play equipment.
- Check local codes and requirements prior to digging or installing any equipment.

Installation Instructions

Step 4: Locate your anchor bolts, supplied by Cre8Play. Using the proper standard drill bit size noted in the installation table, drill the concrete to the appropriate hole depth (C).

Step 5: Insert the anchor bolt into the hole and tighten until the bolt is fully seated. Do NOT over tighten the anchor bolts.

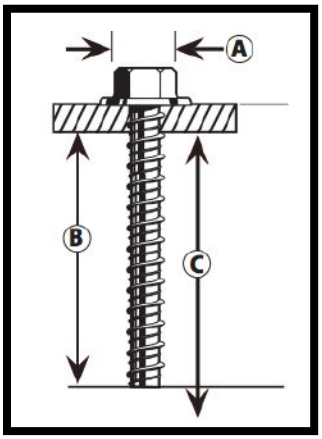

Installation Table

Anchor Bolt Size	ANSI Standard Drill Bit Diameter	Anchor Head (Socket Size) Diameter Ⓐ	Minimum Embedment Ⓑ	Hole Depth Ⓒ
1/2" x 3"	7/16"	3/4"	2 1/2"	3 1/2"

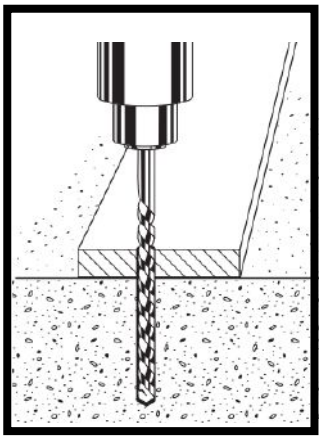

Mounting Detail
(Not to Scale)

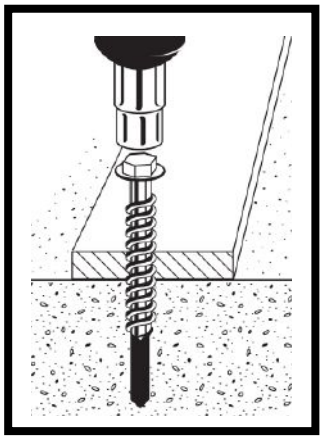

Anchor Bolt (Large Diameter Tapcon) Installation:

Step 1: Drill

Step 2: Anchor

NOTE: Always wear eye protection appropriate to the task at hand.
